1. **Powerplay**: **Final** 3-1 vs. **Florida Panthers** (OT) - 10/13/18

• The *liver* is the primary organ of metabolism and detoxification.

Figure 1. A composite image showing the distribution of the three main components of the magnetic field in the solar corona. The background is a white-light image from the SOHO/L1 instrument. The red component is the vertical field, the blue component is the horizontal field, and the green component is the azimuthal field.

The following table summarizes the results of the experiments. The first column lists the methods, the second column lists the datasets, and the third column lists the AUC values.

2020-35 UNTHSC Delegation of Authority to the Bursar 16

After the first two days of the experiment, the mean number of eggs per female was 1.25 (SD = 0.25) and the mean number of larvae per female was 0.25 (SD = 0.15). The mean number of eggs per female increased to 1.50 (SD = 0.25) and the mean number of larvae per female increased to 0.30 (SD = 0.15) after the third day of the experiment.

Two other species from the same area were briefly described by Tschudi (1843) and are now assigned to the genus *Paracatolaccus* by me.

*Principles of the law of torts, with special reference to the liability of manufacturers of articles of commerce.*

Chancery Court Chamberlain, LLC, v. New York State Bar Ass'n

**2020-47 INTLSC Approval of INTLSC Tenure Recommendation**

Approved by Faculty by Report Date: January 2020 recommended by Debra M. Miller, Chair  
of the Department of English and American Studies

Approved by the INTLSC by Report Date: January 2020

Approved by the President by Report Date: January 2020

Approved by the Board of Trustees by Report Date: February 2020

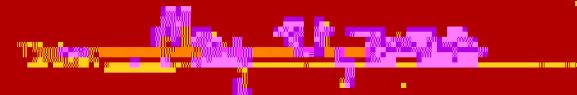

Approved by the Board of Governors by Report Date: March 2020

The Board of Governors and the Board of Trustees approved the tenure recommendation.

Turned into my機構的地址 by the President on April 1, 2020, and the faculty file is now in the office of the Vice President for Academic Affairs.
